# **QUALITY ASSURANCE CONTROL**

## **2.1 Preparation of the Quality Plan**

The Quality Plan shall outline the main aspects of the quality control system, as applicable to the scope of work of the Contractor and shall be supported by a series of Quality Procedures and Work Instructions that detail the operation of the specified activities. The Quality Plan shall contain the following elements as applicable:

### **2.1.1 Project Organization**

- Policy (Authorized) and signed by company executive.
- Organization (in chart form showing lines of responsibility and reporting.)
- Authority, duties and responsibilities of key personnel.
- Liaison with the Engineer and his staff.

### **2.1.2 Monitoring and Upgrading of the Quality Plan**

- Schedule of internal audits
- Management review
- Correction action

### **2.1.3 Preparation and Issue of controlled documents**

- Quality planning schedule and update
- Method Statements
- Work Procedures
- Work Instructions
- Inspection and Test Plan
- Test Procedures

### **2.1.4 Supervision of Quality Associated Activities**

- Preparation of shop drawings and material submittals
- Details and Development Planning
- Activity assignment
- Organizational and technical interfaces
- Design changes ordered by the Engineer or proposed by the Contractor and approved by the Engineer

### **2.1.5 Procurement Control**

- Selection and approval of suppliers and-contractors
- Monitoring and Sub-contractors quality control system (External Audits)

### **2.1.6 Material Control**

- Verification of purchased product
- Product identification and traceability
- Handling, Storage, Package and Delivery
- Purchase supplied product
- Inspection for deterioration of equipment and materials in storage.

### **2.1.7 Test Control**

- Inspection and testing
- Control of non-conforming product

### **2.1.8 Commissioning and Handover**

- Preparation of an overall commissioning plan
- Preparation of a Handing Over Procedure
- Preparation of a procedure for the production and layout of O & M manuals (including: spare parts and special tools)
- Preparation of a Project Close Out Procedure

### **2.1.9 Reporting and Records**

- Reporting system/frequency
- Quality records
- Filing and administration
- Reference

## **2.2 Documentation**

### **2.2.1 Preparation of Method Statements, Work Procedures, Work Instructions as applicable for Construction, Installation, Commissioning and Hand over Activities**

The timely preparation of the Method Statements, Work Procedures and Work Instructions for the construction, installation, commissioning and hand over activities will be the joint responsibility of the Contractor's site construction management and the Contractor's QA Engineer.

As part of the above, the Contractor shall include any necessary inspection and test requirements and shall attach the appropriate inspect and test report format. As a minimum the report format shall include the following:

- Item identification
- Location
- Reference to applicable Method Statement, Work Procedure or Work Instruction.
- Reference to activity number on the Inspection and Test Plan.
- Inspection and test criteria.
- Date and time of inspection of test
- Name of Inspector
- Result
- Retest details (if applicable)
- Approval by Contractor's Quality Representative
- Provision for the signature of the Engineer / Engineer on completion of inspection and test.

All Method Statements, Work Procedures and Work Instruction shall be submitted and reviewed by the Engineer prior to work being allowed to commence.

Within 28 days of contract award, the Contractor shall submit his Schedule for the preparation of the Method Statements, Work Procedures, Work Instruction and Inspection and Test Plan to the Engineer for review and approval. Such statements and procedure shall not replace those required for submission as part of the Contractor's Tender but shall be an amplification offering more details thereof.

### **2.2.2 Preparation of Drawings and Material Submittals**

The Contractor shall prepare a schedule for the preparation, review, internal approval and submittal to the Engineer of drawings and material submittals. The schedule shall be submitted to the engineer for review and approval prior to commencement of drawing production.

The Contractor shall assign the preparation of drawings and materials submittals to experienced and professionally qualified personnel; where necessary the organizational and technical interfaces shall be documented and submitted to the Engineer for review and approval.

Within 28 days of contract award, the Contractor shall submit his 'Schedule for the preparation of Drawings' to the Engineer for review and approval.

### **2.2.3 The Contractor shall establish how method statements and procedures are prepared, reviewed, approved, submitted and thereafter controlled.**

The procedure shall define how documents are promptly removed from all points on internal issues and use.

It shall also show how changes are reviewed and approved by the same functions that performed the original review and approval and that pertinent information is available to the reviewer.

The Contractor shall maintain Master List identifying the current revision status of documents together with their known location.

### **2.3 Preparation of the Inspection and Test Plan**

The Inspection and Test is a document, specifying the sequence of inspections and tests as identified in the applicable method statements, work procedures and work instructions. It shall contain as a minimum the following:

- Activity number
- Activity description
- Reference number and clause number of the applicable method statement
- Work procedure and work instruction
- Contractor's mark up for type of inspection
- Document coding (Contractor retained or as built data pack)
- Remarks column

### **2.4 Preparation of an Overall Commissioning Plan**

This plan is an organized approach to agree on the type of tests, inspections and other actions needed to execute the interim or final commissioning of the work.

Specific attention in this phase will be given to energization of the facility. Safety, tagging, duration tests etc.

### **2.5 Progress reporting**

The Contractor shall establish a progress monitoring and reporting system consistent with contract requirements including but not limited to the following activities:

- Preparation of Method Statements, Work Procedures and Work Instruction.
- Drawing production, review and approval.
- Material submittal and approval.
- Materials submittal and approval.
- Materials ordering status
- Construction
- Commissioning

The format of the progress reports submitted to the Engineer for review and approval.

### **2.6 Preparation of Quality Records**

The Contractor shall prepare an Index for the 'As-build records' data dossier and shall submit it to the Engineer for review and approval.

### **2.7 Administration and Filing Documents**

All documents to be filled according to a structured index.

# 3. QUALITY CONTROL

## 3.1 Inspector's Qualifications

The Contractor shall define the control of the update of Inspectors' Qualifications. Inspectors appointed by the Contractor for product verification shall be fully aware of the contract requirements and shall ensure that finished elements has been verified for compliance prior to inspection and approval by the Engineer staff.

## 3.2 Material Testing

All testing of materials shall be undertaken by accredited independent laboratories approve by the Engineer / Engineer's Representative or as may otherwise be approved by the Engineer / Engineer's Representative for test being conducted at the Contractors own laboratories and as applicable and approved. Testing shall be undertaken against know, National or International approved standards and norms, expect where specific standards are stated in the Contract Documents.

The Engineer/Engineer's Representative shall be given direct communication access to the Contractor's approve independent laboratories and shall receive directly from the testing company verified copies of the original reports, at the time the original reports are provided to the Contractor.

The Engineer/Engineer's Representative reserves the right to request the Contractor to utilize his nominated testing company to obtain actual material samples upon which subsequent testing is performed.

## 3.3 Inspections and Audits by the Engineer personnel

Inspection and Audits carried out by the Engineer staff shall not release the Contractor from fulfilling his contractual requirements and any rejection of the product or system shall be the Contractor's sole responsibility in respect to meeting all contractual requirements.

The Engineer shall have the right of entry to all areas, where activities related to the contract are being performed, in accordance with the Conditions of Contract.

Any non-conformances raised by the Engineer staff shall be addressed by the Contractor without delay and to a time scale agreed by the Engineer.

# Health & Safety

---

**Real Trading & Contracting WLL** recognized its responsibilities under the Health & Safety to ensure that its operations are executed at all times in such a way as to ensure, as far as it is reasonably practicable, the health, safety and welfare of all persons likely to be affected, including employees, sub-contractors, visitors to site and members of the public.

The company is committed to continual improvement of the health and safety management system and to meeting current health and safety legislation and any subsequent changes.

In line with these responsibilities, the Company aims to provide as far as is reasonably practicable:

- a. A safe and healthy working environment for all its employees, the carrying out of risk analyses and the identification of hazards;
- b. Systems of work which are safe and without risks to health;
- c. General training in health and safety so that all employees are made aware of any potential hazards in relation to their work and the latest procedures for overcoming them;
- d. Specific training in safe working procedures, the operation of plant and machinery and accident prevention;
- e. A system for conducting a regular review of the training needs of the workforce;
- f. The provision of regular refresher courses, with reference to training already carried out;
- g. Basic training in health and safety to new employee and young workers and to ensure that whenever new plant or variation in systems of work are introduced, then the appropriate safety training is given;
- h. Personal protective clothing and equipment appropriate to the job in hand;
- i. Guidance on what to do in the event of an emergency;
- j. On-site welfare and first-aid provision which complies fully with the statutory requirements together with a system for maintaining the equipment;
- k. Adequate firefighting equipment and fire training, in liaison with the fire authority;
- l. A means of contact with the relevant health and safety bodies so that up-to-date information on legislation, codes of practice and other technical guidance is available within the company and is circulated promptly to all concerned.
